- **The Lego Game with Tens** - this game can be played with 2 or more people, using all of the aces through 10s from one deck of cards and a set of 20 or more Lego pieces.
  - Place one of the 10 cards in the center of the table and the rest of the cards face down in a pile. Each player takes turns drawing a card from the pile and adding this number to the 10. The player with the highest sum gets to select a Lego piece. If a tie occurs for the largest sum, then all players with the largest sum select one Lego piece each.
  - At the end of the game, each player gets to make a Lego creation to share. For older children, this game can be adapted to play with points, or using a Cribbage board, rather than building with Legos.
