Goal 5 - With 5s (part 2)

Add: $5+6$, $5+7$, $5+8$, $5+9$

Sub: $11-5$, $11-6$, $12-5$, $12-7$, $13-5$, $13-8$, $14-5$, $14-9$

- **The Lego Game with Tens** - this game can be played with 2 or more people, using one 5 and all of the 6s, 7s, 8s, and 9s from one or two decks of cards, and a set of 20 or more Lego pieces. (Once the student is confident with these four facts, you can add in the aces through 5s to solidify all of the with 5s.)
 - Place one of the 5 cards in the center of the table and the rest of the cards face down in a pile. Each player takes turns drawing a card from the pile and adding this number to the 5. The player with the highest sum gets to select a Lego piece. If a tie occurs for the largest sum, then all players with the largest sum select one Lego piece each.
 - At the end of the game, each player gets to make a Lego creation to share. For older children, this game can be adapted to play with points, or using a Cribbage board, rather than building with Legos.
